

M. Mudaffarsyah

Software Developer

Tanjungpinang, Indonesia | [+6282172068582](tel:+6282172068582) | mudaffsyah@gmail.com | [LinkedIn](#)

SUMMARY

Informatics Engineering graduate with competencies in software development and machine learning. Experienced in collaborating within a team as a Full-Stack Web Developer and developing a real-time monitoring system to track data from IoT sensors. Enthusiastic about applying software engineering and data analysis skills to support digitalization and improve operational efficiency in industrial environments.

EDUCATION

Informatics Engineering, Raja Ali Haji Maritime University | Tanjungpinang, Indonesia

Bachelor of Engineering, Jul 2022 - Jun 2026

- **GPA** (3.70/4.00) Cum Laude
- **Relevant Courses:** Software Engineering, Machine Learning, Data Structures & Algorithms, Object-Oriented Programming, Distributed System, Database Systems.
- **Thesis Title:** Performance Analysis of Local Training in a Federated Learning System for Waste Classification Using the ResNet-18 Architecture.

PROFESSIONAL EXPERIENCE

Dinas Komunikasi dan Informatika Kota Tanjungpinang | Tanjungpinang, Indonesia

Fullstack Web Developer, Jul 2025 - Sep 2025 ([Certificate](#))

- Collaborated within a cross-functional team to design and develop digital solutions, contributing to UI/UX design, front-end and back-end development, and deployment.

Raja Ali Haji Maritime University | Tanjungpinang, Indonesia

Research Team, Jul 2024 - Nov 2024 ([Certificate](#))

- Collected mangrove data, contributed to development of an AI-powered mobile application for mangrove species detection, and produced project documentation and video materials for research reporting.

Practice Assistant, Mar 2024 - Jun 2024 ([Certificate](#))

- Delivered database systems instruction, assisted students with coursework and practical assignments throughout the semester, and supervised final competency assessments.

PROJECTS & SKILLS

- **Projects:** Anomaly Detection System: Prototype (2026), Waste Sort: Federated Learning Based Waste Classification (2026), IoT-Based Flood Detection and Monitoring System (2024), Predict 1.0: Sales and Inventory Forecasting System (2024), QIQO: Real-Time Interactive Quiz Application (2025).
- **Technical Skills:**
 - **Web Development:** FastAPI, PHP, JavaScript, Node.js, Laravel, Vue.js, Next.js, MongoDB, MySQL.
 - **Mobile Development:** Kotlin, Jetpack Compose, Flutter.
 - **Machine Learning & AI:** Python, PyTorch, Deep Learning, Computer Vision.
 - **Others & Tools:** Git, GitHub, Android Studio, Visual Studio Code.
- **Interpersonal Skills:** Problem Solving, Teamwork, Communication and Adaptability.
- **Languages:** Intermediate in English ([Certificate](#)), Native in Indonesian.
